How to arrange a safe crib environment

Cubo Medical Consultant - Pediatrician Dr. Yeh recommends parents with newborn babies to follow the guidelines below to ensure the safety and sleep quality of your baby.

Clear the crib!

- ✓ Don't add bumper pads to the bed rail
- ✓ Sleep in the same room as the baby, but not on the same bed
- ✓ Avoid using pillows, toys, and blankets
- ✓ Wear a onesie for pyjamas to reduce the chance of covering the face
- ✓ The mattress should be hard enough, so the baby's face won't sink in

Sleeping on the back is the safest

When sleeping on the belly, it could lead to indirect suffocation and cause the following hazards:

- Reduce the oxygen levels in the blood
- Increase in body temperature
- Affect the autonomic nervous system

Product liability insurance: This product has been insured by product liability insurance for 30,000,000NTD

Precautions:

1. Cubo AI Baby Camera is not a medical device and should not be used as a SIDS (Sudden Infant Death Syndrome) prevention tool. This is only a tool for caregivers to monitor their baby's; the caregivers must check the baby's condition regularly. For premature or potentially ill infants, this product should be used under the direction of a doctor or a medical professional. For more details, please refer to the product website or the terms of use and privacy policy on the App.

2. Please install Cubo according to the instructions in the instruction manual. If the Cubo camera and bracket are installed properly, it may prevent unnecessary accidents. Please follow the instructions in the manual.

Product name: Cubo AI Baby Monitor; Model: Cubo 1 Input: 100-240V, Output: 5V2A, 2.4/5GHz Wi-Fi

FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement:

1. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.

Cubo

Quick Start Guide

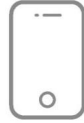

Give your baby the smartest safeguard

Easily install by yourself in 2 steps!

Prepare these and you're ready to go!

Wi-Fi

Smart Phone

1. Install the bracket

Based on your bracket type, assemble according to the diagrams

A. Standing bracket

B. Bed bracket

C. Mobile stand

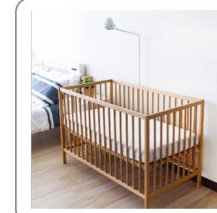

2. Download Cubo App and begin pairing

Cubo AI 寶寶攝影機

A. Standing bracket

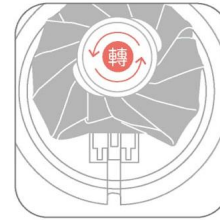

It should look like..

- ✓ Base is tucked underneath the crib
- ✓ The stand is against the wall
- ✓ Place the entire setup next to the long side of the crib

Tutorial Video

STEP 1 Fill the water bag 80% full

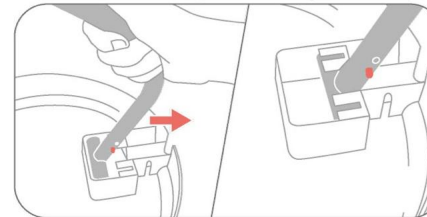

Take off the lid of the base and take out the water bag. Turn the lid open and fill it 80% full before putting it back into the base.

⚠ The water bag is used to support the base!

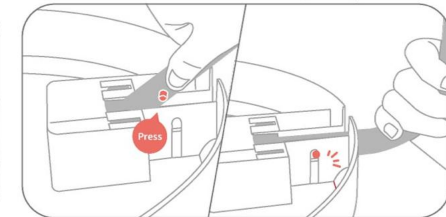

STEP 2 Latch the L-shaped bracket into place with the button

2-1 Insert the L-bracket and pull it back so it locks into place with the groove.

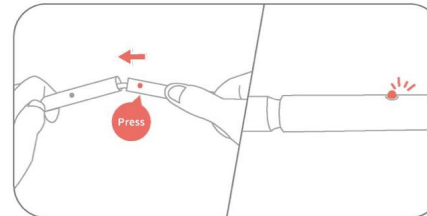

⚠ When the L-shaped bracket is pulled backwards it will be caught in the groove

2-2 Press the button and pull the bracket down so the button is locked into place by the hole

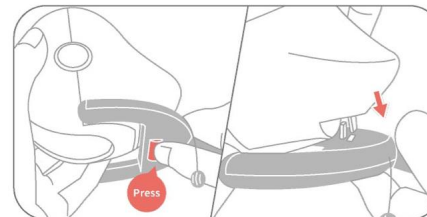

⚠ Only when the button is protruding out is it complete!

STEP 3 Assemble the U-shaped bracket and insert the L-shaped bracket

Press the button down and assemble the brackets. Only when the button is protruding out is it complete!

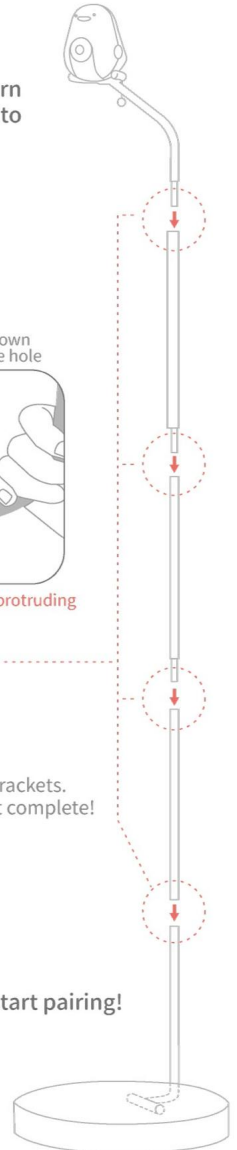

STEP 4 Insert Cubo into the U-bracket, connect the power supply, and wait until the "Status Light" turns on.

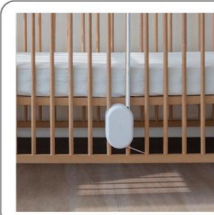

Once it is on, download the app and start pairing!

First hold the safety lock, then insert the baby monitor into the bracket

⚠ Remember to hold the safety lock!

B. Bed bracket

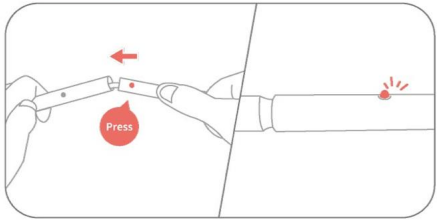

It should look like..

- ✓ Attach to the bed rail as low as possible
- ✓ Place on the side closest to the wall
- ✓ Clamp on the long side of the crib

Tutorial Video

STEP 1 Assemble the U-shaped bracket

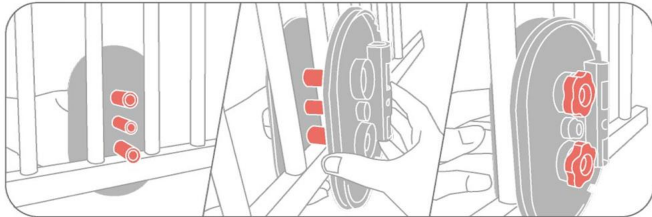

Press the button down and assemble the brackets. Only when the button is protruding out is it complete!

Once the U-shaped bracket is assembled, put it to the side: it will be used after we finish assembling the rest of the bed bracket!

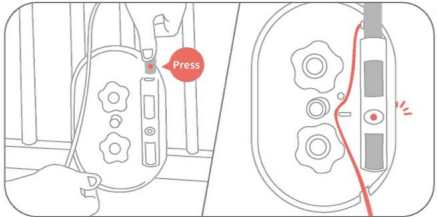

STEP 2 Pull apart the base of the bed bracket and secure it to the bed rail

2-1 Place screw holes on the outside of the bed and lock it into place with the two screw nuts

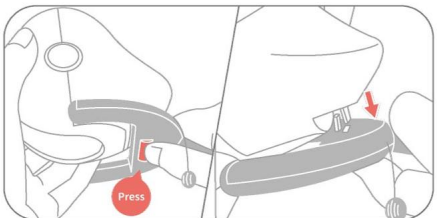

⚠ Remember to place the base of the bracket as low as possible on the bed rail, so the baby monitor isn't too high up!

2-2 Insert the already assembled U-shaped bracket into the bed frame, cover the power cord, and close the cover

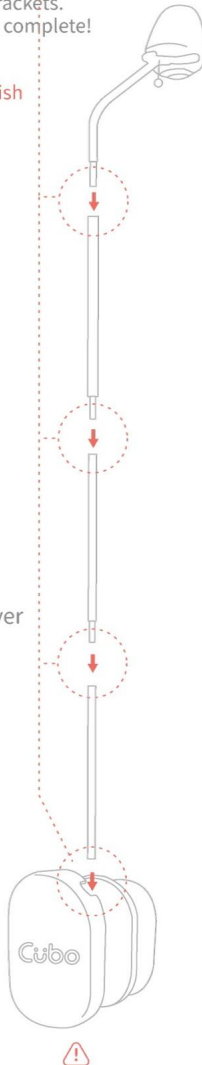

STEP 3 Insert Cubo into the U-bracket, connect the power supply, and wait until the "Status Light" turns on.

First hold the safety lock, then insert the baby monitor into the bracket

⚠ Remember to hold the safety lock!

Pull apart the base of the bed bracket before assembling

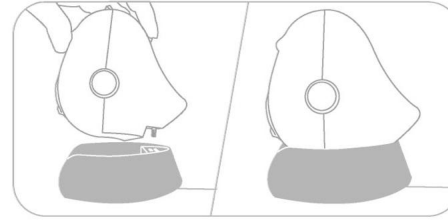

C. Mobile stand

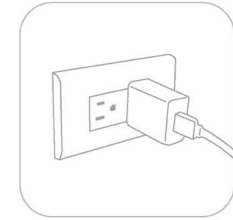

Tutorial Video

STEP 1 Insert the baby monitor into the mobile stand

STEP 2 Connect the power
